GenAI.works

5 GitHub Repos

Build Faster at Your Next Hackathon

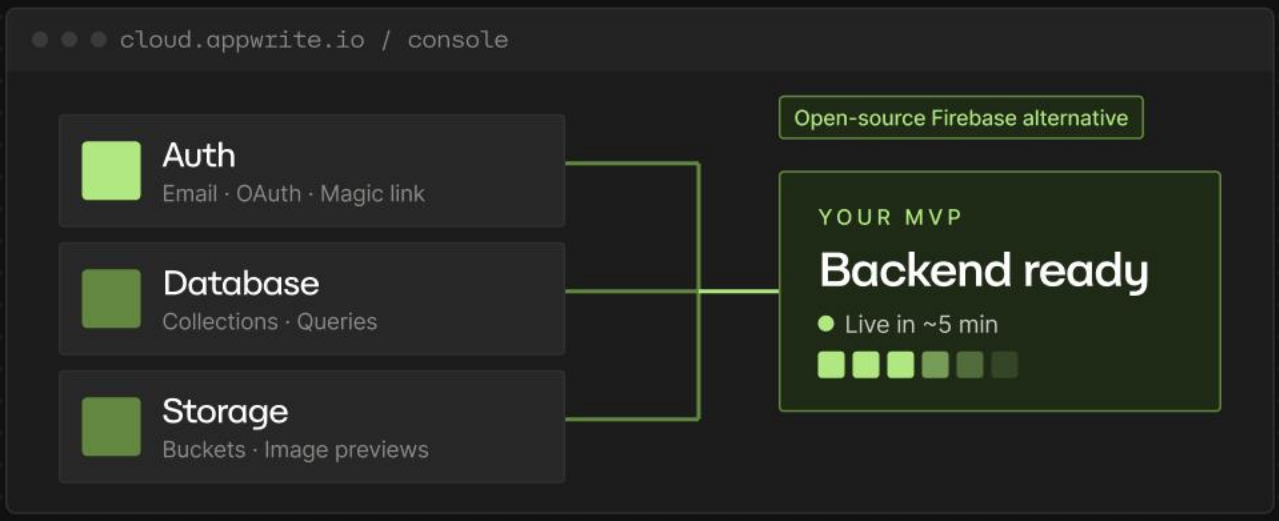

Spend less time setting up.
More time building.

GenAI.works

01 OPEN SOURCE · BACKEND

Appwrite

Backend in Minutes

- Open-source alternative to Firebase
- Built-in authentication, database, and storage
- Quickly build the backend for your MVP

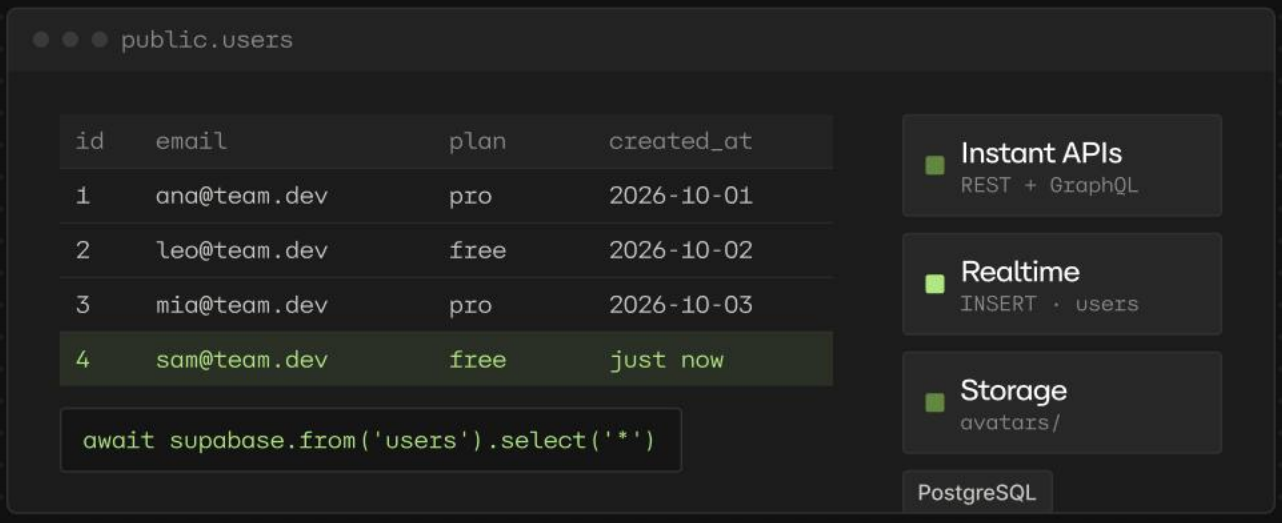

github.com/appwrite/appwrite

GenAI.works

02 OPEN SOURCE · DATABASE

Supabase

Database Made Simple

- PostgreSQL database with instant APIs
- Real-time updates and file storage
- Build and test your MVP faster

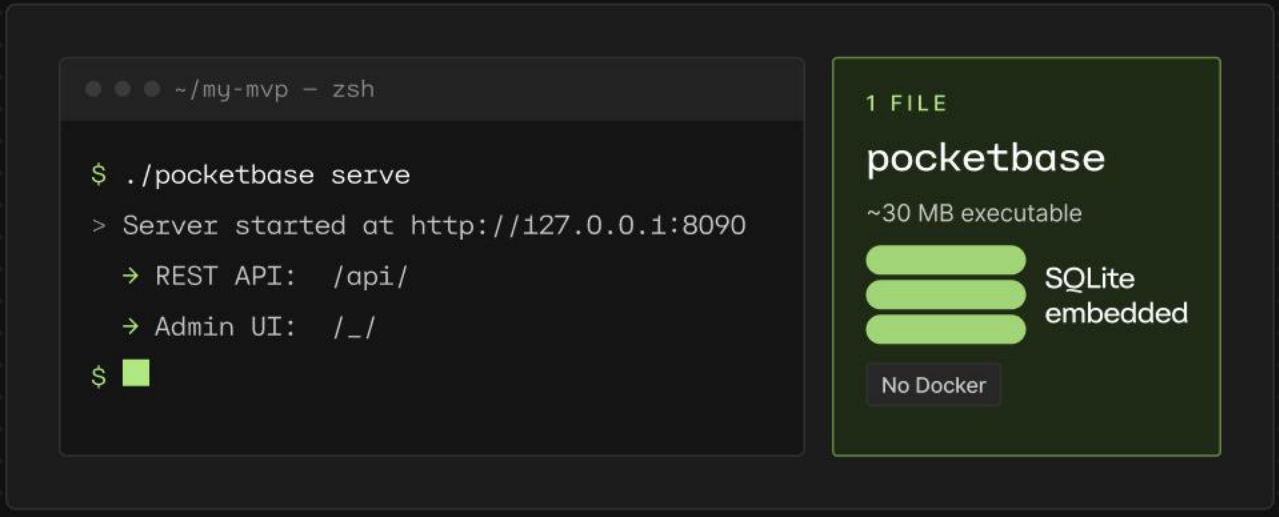

github.com/supabase/supabase

GenAI.works

03 OPEN SOURCE · BACKEND

PocketBase

Backend in One File

- Single executable with embedded SQLite
- Built-in authentication and APIs
- No Docker required for quick prototyping

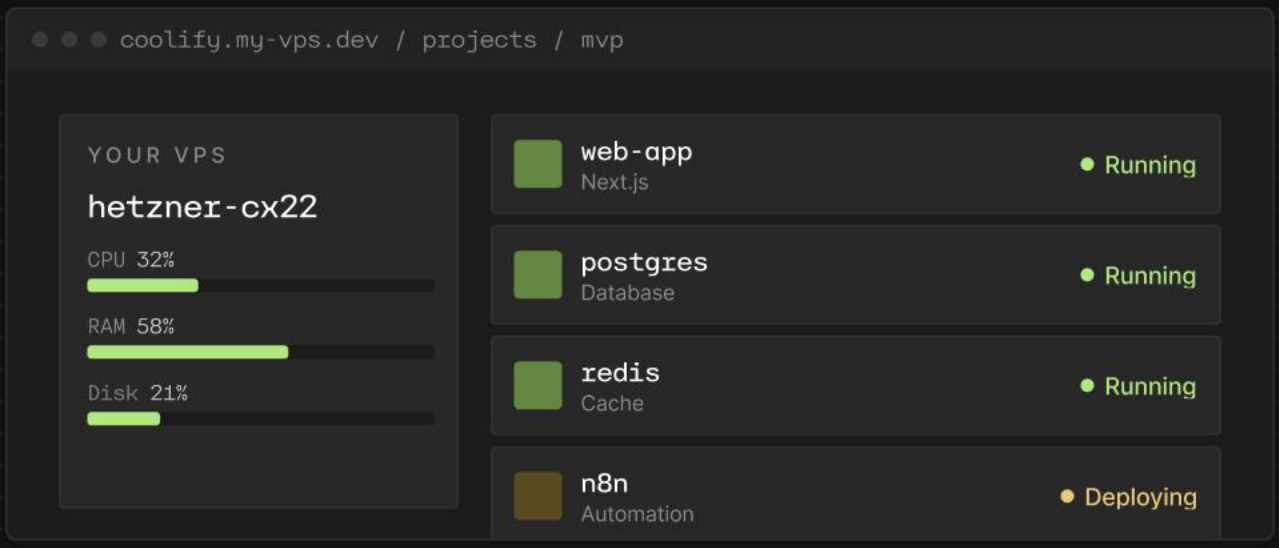

github.com/pocketbase/pocketbase

GenAI.works

04 OPEN SOURCE · DEPLOYMENT

Coolify

Simplified Deployment

- Deploy apps and databases on your own VPS
- Manage services through a visual dashboard
- Self-host without complex deployment pipelines

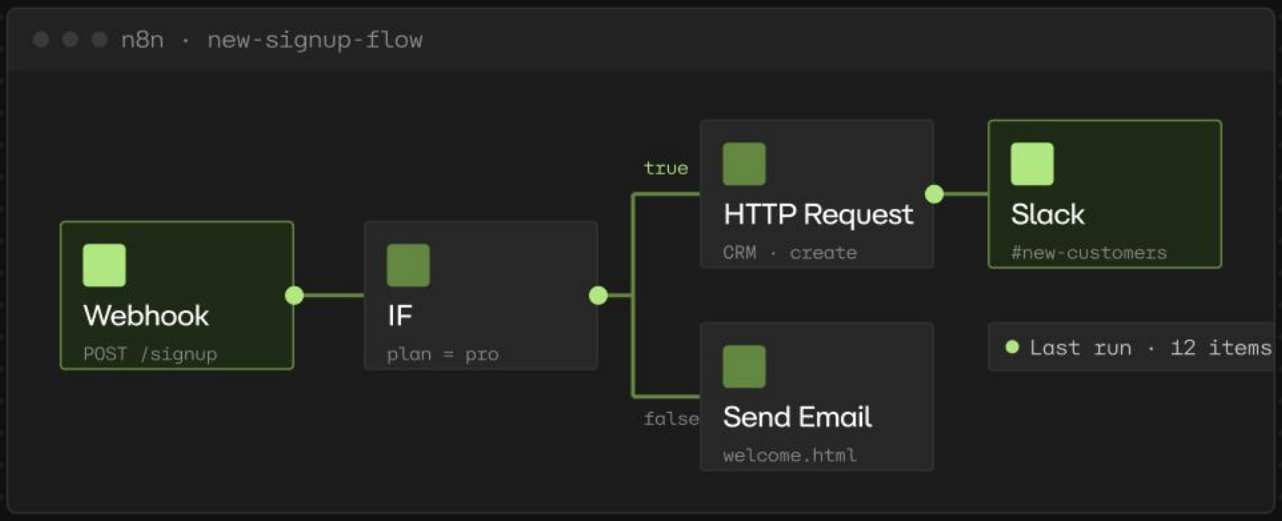

github.com/coollabsio/coolify

GenAI.works

05 OPEN SOURCE · AUTOMATION

n8n

Workflow Automation

- Connect apps and APIs with visual workflows
- Automate repetitive backend tasks
- Build complex logic with less custom code

github.com/n8n-io/n8n
